

DEV100-WH

RASPBERRY PI ZERO WH AVEC CONNECTEUR GPIO SOUDE PROFESSIONNELLEMENT

A tiny Raspberry Pi that's affordable enough for any project - now with WiFi and Bluetooth! This **WH version** includes a 40-pin GPIO header professionally soldered into place for you - no soldering required!

The Raspberry Pi Zero WH is the smallest member of the Raspberry Pi family but still packs a LOT of features including WiFi, Bluetooth, mini-HDMI, a micro-USB port and camera connector.

The familiar 40-pin GPIO header from the larger Raspberry Pis is included (**soldered in place for you**), great for adding [HATs and pHATs](#) or simply connecting your project components with [jumper wires](#).

In terms of computing power the Zero WH features a 1GHz processor (BCM2835) and 512MB RAM - not as powerful as the mighty [Raspberry Pi 4](#) of course, but still plenty of grunt for a huge range of fun projects.

We also stock a [great range of cases](#) for the Raspberry Pi Zero to keep your new favourite board safe.

Raspberry Pi Zero WH (with pre-soldered header) Details:

- BCM2835 (same as Pi 1) but up-clocked to 1GHz, so 40% faster
- 512MB RAM
- Mini HDMI
- USB On-The-Go port
- Micro USB power
- HAT-compatible **40-pin header pre-soldered**
- Composite video and reset headers

- CSI camera connector
- 802.11b/g/n Wireless LAN
- Bluetooth 4.1
- Bluetooth Low Energy (BLE)
