600mm/s Printing Speed	Versatile AI LiDAR	Observant AI Camera	300*300*300 Large Build Volume

12X Faster and More Efficient
600mm/s speed and 20000mm/s² acceleration.
12 times faster than the competition.

Max. 32mm³/s Flow Hotend
New ceramic heater, encircling the entire hotend,
heats to 200℃ in 40s and melts the filament instantly.

Size-efficient with Max Capacity
It offers a 300x300x300mm large build volume,
the biggest compared with similar-sized printers.

1μm Resolution AI LiDAR
Scan the first layer and auto-tune the feeding flow to the best,
giving you quality models.

Observant AI Camera
Recognize spaghetti failure, foreign matter, debris, etc.
and support real-time monitoring and time-lapse filming.

Multi-printers Control
Monitor and control your prints with Creality Cloud APP/WEB
or Creality Print via WiFi or RJ45 Ethernet port.

Solve Ringing and Z-banding
Smart G-sensor to resolve ringing for high-speed printing.
Accurate Z-axis positioning for less Z-banding.

Dual Hands-free Auto Leveling
Use AI LiDAR and strain sensors to measure the distance
between the nozzle and the build surface for auto leveling.

Print Right Out of the Box
Assembled and calibrated before shipment.
Also featuring a boot-up quick guide and self-test.
